SUMMARY

Full Stack Engineer with 1+ year of professional experience building and deploying full-stack web applications using JavaScript (ES6+), TypeScript, Node.js, and PostgreSQL. Proven track record implementing access control systems, RESTful API integrations, OAuth authentication, and payment gateway solutions. Experienced with Agile development, CI/CD pipeline management, and cloud services including Google Cloud and AWS.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Material UI, Redux, Responsive Design

Backend: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Supabase, Row Level Security

Tools & DevOps: Git, GitHub, Docker, Postman, Figma, CI/CD, Vercel, Google Cloud, AWS

Practices: Agile Development, Pipeline Management, Design Patterns, Code Review, Problem Solving

Auth & Security: OAuth, JWT, Role-Based Access Control (RBAC), Server-Side Authorization

EDUCATION

Bachelor of Computer Science

2021 – 2025 | Alexandria, Egypt

Faculty of Computer and Data Science, Intelligent Systems Department, Alexandria University — CGPA: 3.164

PROFESSIONAL EXPERIENCE

Teleme | Full Stack Engineer

11/2025 – Present | Oman (Remote)

- Built and deployed a scalable full-stack web application using React.js, Node.js, and Supabase, establishing role-based access control (RBAC) and OAuth-based authentication across 3 user roles (patient, doctor, admin).
- Secured 100% of authorization checks server-side using PostgreSQL Row Level Security (RLS) and Supabase Edge Functions, eliminating auth vulnerabilities across all API endpoints.
- Incorporated a payment gateway to automate appointment billing, improving transaction reliability and reducing manual processing overhead.

Elevvo Pathways | Front-End Developer Intern

07/2025 – 08/2025 | Cairo, Egypt

- Produced responsive web application interfaces using React.js and JavaScript (ES6+), cutting page load times by 15% through component refactoring and code splitting.
- Collaborated in an Agile team to consume RESTful APIs and manage CI/CD pipeline deployments, boosting data fetching efficiency and reducing server response time by 10%.

PROJECTS

Shawerni — Expert Consultation Platform

Launched a full-stack web application enabling users to discover and book 1-on-1 video and voice sessions with verified experts across tech, business, law, and finance. Established OAuth and JWT-based multi-role access control (expert/client/admin), real-time availability scheduling, and OMPay payment gateway for seamless session billing.

Live: shwerni.net

Tech Stack: React.js, Node.js, TypeScript, PostgreSQL, Supabase, Tailwind CSS

Wave! — AI-Powered Sign Language Recognition App — Graduation Project

Architected a full-stack web application for ASL learning featuring interactive lessons, quizzes, and real-time AI gesture recognition. Achieved 95% model accuracy across 200+ signs by training custom ONNX models with MediaPipe hand tracking, refined to run at 30 FPS in-browser via ONNX Runtime.

Tech Stack: React.js, Node.js, Express.js, MongoDB, TensorFlow.js, ONNX Runtime, MediaPipe

Teleme — Healthcare Web Platform

Led the development of a full-stack web application supporting clinic and video consultations, digital prescriptions, real-time doctor availability, and admin management. Secured patient data server-side using PostgreSQL, Supabase Edge Functions, and cloud services for pipeline management, with OMPay for in-app payment processing.

Live: teleme.net

Tech Stack: React.js, TypeScript, Supabase, PostgreSQL, Supabase Edge Functions, CSS, Docker

Courtly — Sports Venue Booking Platform

Developed a full-stack web application for sports venue booking with a PostgreSQL schema supporting high-concurrency reservations. Produced a cross-device responsive design achieving a 90+ Lighthouse performance score, deployed via GitHub CI/CD pipeline.

Live: courtly-theta.vercel.app

Tech Stack: React.js, Node.js, TypeScript, PostgreSQL, Tailwind CSS, GitHub

Nashd — Digital Services Super-App — Landing Page

Created a fully responsive landing page using Next.js for an Omani super-app covering 6+ service categories. Boosted discoverability through semantic HTML, Open Graph tags, structured metadata, and accessibility best practices for improved search engine indexing.

Live: nashd.app

Tech Stack: Next.js, Tailwind CSS, TypeScript
